Pricing & Discount Policy

Brightline Supplies Inc. | Document POL-PRC-003 | Version 3.2 | Effective 1 July 2025

1. Purpose

This policy sets out list pricing, volume discounts and the approval rules for discounts offered to B2B customers.

2. List pricing

List prices are published in the product catalogue and are in US dollars, excluding tax and freight. List prices are reviewed every January and July. Customers are given 30 days' notice of any list price increase.

3. Volume discounts

A volume discount applies per product line, based on the quantity of that product on a single order:

Units per order (single product)	Volume discount
50-99	5%
100-249	8%
250+	12%

Quantities below 50 units receive no volume discount.

4. Tier discounts

Customers in higher tiers receive an additional discount, applied on top of any volume discount:

Customer tier	Additional tier discount
Standard	0%
Gold	2%
Platinum	4%

Tier is reviewed annually. A customer moves to Gold after $150,000 in trailing twelve-month revenue and to Platinum after $500,000, subject to account manager approval.

5. Stacking and caps

Volume and tier discounts stack, but the **total discount on any line may not exceed 20%**. Any discount above **15%** requires written approval from the Sales Director before the order is confirmed. Discounts above 20% are not permitted under any circumstance.

6. Contract pricing

Customers with an annual commitment of $250,000 or more may negotiate fixed contract prices for up to 12 months. Contract prices replace volume discounts but not tier discounts, and are subject to the same 20% cap relative to list.

7. Late-delivery credits are not discounts

Account credits issued under the Shipping & Delivery SLA are service credits. They do not count toward the 20% discount cap and do not affect a customer's tier revenue calculation.

8. Payment terms

Standard payment terms are net 30. Platinum customers may request net 45. A 1% early-payment discount applies when an invoice is paid within 10 days.
