Customer Support Handbook

Brightline Supplies Inc. | Document POL-SUP-004 | Version 3.2 | Effective 1 July 2025

1. Mission

Our support team resolves customer issues quickly, fairly and consistently. This handbook defines ticket priorities, response and resolution targets, and escalation paths.

2. Ticket priorities and targets

Priority	Definition	First response	Resolution target
P1 - Critical	Customer operations blocked; large order lost	1 hour	8 hours
P2 - High	Order late by 3+ days, damaged goods on large order	4 hours	24 hours
P3 - Normal	Billing queries, wrong item, standard damage claim	1 business day	3 business days
P4 - Low	General questions, catalogue requests	2 business days	7 business days

Platinum customers' tickets are automatically raised one priority level (for example P3 becomes P2).

3. Issue types

Every ticket is tagged with one issue type: **Late Delivery**, **Damaged Item**, **Wrong Item**, **Billing**, or **Warranty**. Agents apply the matching policy: Shipping & Delivery SLA for late deliveries, Returns & Refund Policy for damaged or wrong items, Pricing Policy for billing and the Product Catalog & Warranty Guide for warranty claims.

4. Handling a late-delivery ticket

Step 1: confirm the ship date, delivered date and SLA days on the shipment record. Step 2: calculate days late (delivered date minus ship date, minus SLA days). Step 3: apply the compensation credit from the SLA table (5%, 10% or 15%). Step 4: record the credit on the ticket and notify the customer. Step 5: if more than 5 days late, offer free return shipping and a full return option.

5. Handling a damaged-item ticket

Confirm the claim was raised within 7 days of delivery, collect photographs, then offer the customer a full refund or replacement. Brightline pays return shipping. Log the carrier so Logistics can raise a carrier claim.

6. Escalation

Escalate to the Support Team Lead when: a refund exceeds $2,500, a customer has raised three or more tickets in 30 days, or a P1 ticket has not been resolved within 4 hours. Escalate to the Director of Customer Operations for refunds above $10,000 or any legal threat.

7. Quality standards

All replies must be reviewed for tone and accuracy. Every closed ticket is followed by a one-question satisfaction survey. The team's target is a customer satisfaction score of 92% or above and 95% of tickets meeting their first-response target.
